[Note: This posting is labeled “unlisted” meaning that it is intended only for paid members.]

So, I recently watched a video with Michael Salla and Lily Nova, which I found very interesting and Lily Nova has a background in astrophotography. She was talking about how she had witnessed some what she thought was ET craft over and above where she lives. She lives in Sedona in the USA and she brought up some very good points and a lot of what Lily was saying resonated deeply with me even though I hadn't looked into all of the of the areas that she had been talking about previously. So, I was due to do a 3I Atlas update and so I've had a look all around some more of the latest updates around 3I Atlas including some of the observations made by Lily.

So, the first question I asked was, **"Are the photos that Lily takes over Sedona, are they military craft or ET craft?"** And they said to

me that, “They are ET craft.”
And I said, **"Do they belong to the Galactic Federation of Light fleet**?" And they said, "No, these particular sightings that Lily saw above Sedona were of a separate organization to the Galactic Federation fleet.” And they drew me a little diagram where they showed the Galactic Federation and then underneath there were three arrows and it said subfleet, subfleet, subfleet.
So I think what they're saying is that what Lily saw in Sedona was ET craft, but they're describing it as a subfleet of the Galactic Federation of Light.
So I said, **"Who operates the subfleets and are they of the light**?" And they said, "Fleets that are outside of the Galactic Federation of Light are both light and dark."
And I said**, "Which fleets did Lily see? Were they dark or light, the ones that she saw over Sedona?”**. And they said “Both were in that video clip. The dark ones were cloaked and above the visible ones which could be seen on the night camera footage.”
I asked them, **"Why did these craft and their crew ask her to photograph them?"** And they said that, “It was for soft disclosure because they trust Nova.”
And I said, **"Is this why they gave permission over Sedona because that's where she lives?"** And they said, "Yes."
During her conversation with Michael Salla from Exopolitics, she also mentioned something about the Solar Warden. I asked, **"What is the solar warden?"** They said to me that, “The solar warden is a frequency surrounding the ships as they move. It's like a protective frequency and it helps them to cloak when necessary.”
So, I wanted to look into what Solar Warden was a bit more. So I put that into chatGBT. They're saying to me in chatGPT that Solar Warden is the name of an alleged secret space program which is said to be operated by the US and allied governments under the guidance of extraterrestrial or higher dimensional civilizations and that the core concepts are that it's a fleet of advanced spacecraft which patrol/control the solar system to monitor extraterrestrial activity and protect Earth. And it's claimed to be managed by the US Navy, Air Force, and international partners. And it's said to use anti-

gravity propulsion, zero point energy, and quantum communication. And it's linked to the GA the Galactic Federation of Light and Ashtar Command. They're saying on a spiritual level that the solar warden is viewed as a higher dimensional guardian fleet which maintains cosmic order and supports Earth's ascension processes.
So, I'm wondering if Lily Nova captured the Solar Warden activities on her video.

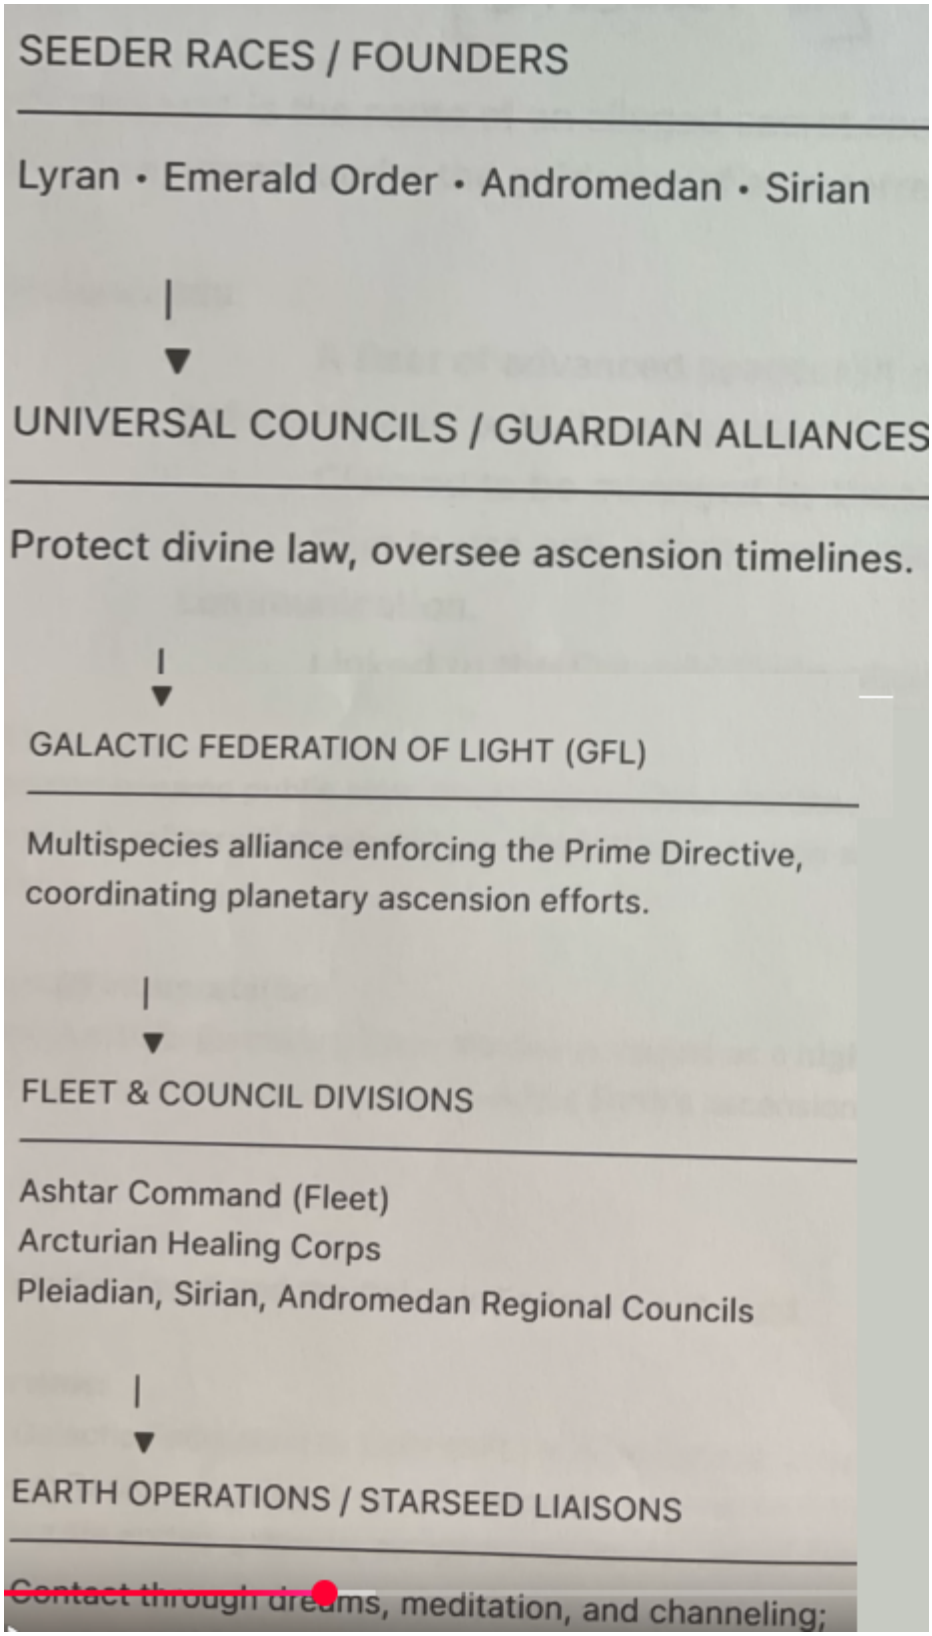
SALLA INTERVIEW CLIP:
DR. SALLA: Some of the craft and then just interacting with for about an hour. I'll just mute that:
LILY: “Yeah. Yeah. I'm going crazy. I'm like, ‘Oh my god, they said get your camera ready. They were not lying.’ You know, it's always amazing whenever you get that like the evidence of it, you know and it aligns perfectly. So, you can see another one that's starting to come up. You know, this is an Aurora Psionics night vision camera. It's not the best camera, so that they look like lights. It's not super detailed, but you can definitely see they're going different heights and speeds, and it's about a six-minute clip, but they do some very interesting maneuvers. If you like fast forward a little bit, there's another part where you can see them kind of interacting with each other. Well, there's another part where I circle it where they do another triangle formation, which is pretty. You might see like a red circle or something like that. Probably right there. Yeah, it's about to happen. This was pretty So, you can see them starting to come through. We've got about four or five there. And they would power up, too. So they expand. They get brighter. This happens a lot at eSETI, the powerups. They expand. I've seen that quite a few times. Um, that's also evidence to me that it's not like a normal craft. It's not a drone. It's not a satellite. Sometimes you'll get like satellites, but those are way high up in the sky that show maybe like a reflection of the sun or whatever. You know, this is a power up where it's expanding and illuminating.
DR. SALLA: All right. Very spectacular. And as you as you mentioned, and this is evidence of the communications you're having

with these beings and so that's great to have that kind of corroboration."
END INTERVIEW CLIP

MICHELLE: So going back to 3I Atlas, I said **"Does it have different roles and if so, what are the roles?"** They said that "The 3I Atlas is an unmanned ship which is surrounded by smaller manned ships that are using solar frequencies to power up the grid on Earth to elevate the collective consciousness to 7D."
So I said **"Is this so that we can align to the rapture?"** And they said "Partially, 3I Atlas has a variety of roles which are to harness energies, frequencies, sonics and sounds."
I said **"So what about the accompanying ships? Are they manned."** They said, "Yes."
I said **"What's their role?"** and they said, "To accompany the 3I Atlas safely as it passes through the trajectory."
I said to them, **"So 3I Atlas is traveling via Mars on the other side of the sun, which is away from Earth."** And they said, "Yes."
And I said, **"So what is its intended purpose as it approaches or passes by Mars?"** And they said, "As it approaches Mars, the 3I Atlas will deliver codes and frequencies that Mars also needs in order to align with Earth." And I said, **"So why does Mars need to align with Earth?"** They said, "These two planets and their inhabitants will work together to create a synergy of cultures going forward."
And I said, **"Why does a synergy need to be cultivated?"** They said, "The two planets have similar frequency codes and it will align to help a quantum shift in the universe."
And I said, **"Why does Mars need to be involved for Earth to create a quantum shift in the universe?"** And they said, "Earth can create a quantum shift alone but in combination with Mars the jump will be more exponential. There is a possibility they've said that after the rapture which is 7D that Mars and Earth's combined frequencies will start a trajectory for Earth towards 9D."
I said, **"Is the sun involved in this process?"** and they said "Not exactly. The sun is being used as fuel to the movement and power of

the 3I Atlas. The 3I Atlas is powered by fusion technology which the sun solar rays help to activate."
And I said, **"So, will Martians be working with the 3I Atlas in an attempt to visit Earth?"** And they said that "Martians are already on Earth."
I said, **"Are they in underwater bases as had recently been discussed on Michael Salla?"** And they said, "Some are, but others are working already in government and military facilities."
And I said, **"What are they doing exactly?**" They said, "They're helping technicians to understand future quantum technology in science."
And I said, **"Do they look different?"** And they said, "Only at a cellular level. They do not look different to the earthling or to the human eye. They are slightly shorter on average to a human, but not always, and they think and speak very logically, but have compassionate hearts."
I said, **"Are Seeder races accompanying the 3I Atlas in the smaller ships?"** They said, "No, not exactly." They said the smaller ships are mainly or largely unmanned, but those that are manned are personnel from the Galactic Federation of Light.
I said, **"Can you explain what the Seeder races are?"** They said, "The Seeder races are said to be the original inhabitants on Earth and they came from other galaxies and star systems to create beings on Earth to create the civilizations. The world was divided up and beings were seeded into specific civilizations in certain geographical regions where they thought they would best thrive. So for example, certain Seeders would be placed in hot climates and others in cold climates."
I said **"Did the Seeder races create the Galactic Federation of Light?"** They said to me "Only the Pleiadians."
So there has been talk that there are Lyran energy in and around the 3I Atlas whether that's the frequency that it's holding or whether the smaller ships are manned by Lyran energy. So I wanted to understand who the Seeder races were inside the Galactic Federation at this time. So again, I pulled this information up from chatGPT. They said to me that the Galactic Federation of Light is

described as a multi-civilization alliance which was established by the Seeder races which are also known as the founders or the Emerald Order and that these ancient races are said to have seeded life across galaxies and they designed the divine human DNA blueprint. They said the Lyrans are the first humanoid beings or originators of the human template and that they provide the guardian genetic codes and moral foundation of the federation. They said the Andromedans which are higher dimensional teachers and record keepers serve as council advisers. They said the Arcturians are the healers and the ship engineers and they operate healing and light ship fleets and the Pleiadians are the closest to Earth's DNA lineages and they act as ambassadors and messengers. The Syrians, they are the keepers of the cristic and crystalline technology and they oversee the ascension grid programs and that the emerald order or the Anasazi are the original founders and the overall architects. They are the spiritual overseers of all federation councils.



SEEDER RACES / FOUNDERS
Lyran • Emerald Order • Andromedan • Sirian
UNIVERSAL COUNCILS / GUARDIAN ALLIANCES
Protect divine law, oversee ascension timelines.
GALACTIC FEDERATION OF LIGHT (GFL)
Multispecies alliance enforcing the Prime Directive, coordinating planetary ascension efforts.
FLEET & COUNCIL DIVISIONS
Ashtar Command (Fleet)
Arcturian Healing Corps
Pleiadian, Sirian, Andromedan Regional Councils
EARTH OPERATIONS / STARSEED LIAISONS
ms, meditation, and channeling;

So if you look at this diagram, they're saying that the governance structure for the Seeder races and founders is that the Lyran, Emerald Order, Andromedan, and Syrians created universal councils or guardian alliances to protect divine law and oversee ascension timelines, and that the Galactic Federation of Light, who are multi who are a multispecies alliance. They enforce this prime directive and they coordinate planetary ascension efforts and they have a fleet and council divisions. And within that fleet we have commander Ashtar or Ashtar command. We have the Arcturian healing corps. We had the Pleiadian, Syrian Andromedan regional councils and these create Earth operations or star seed liaison and they make contact through dreams, meditation and channeling. So I said will the smaller ships land on Earth the smaller ships which are accompanying 3I Atlas some manned some unmanned.

I said, **"Will the smaller ships land on Earth**?" And they said, "No, that is not their goal. Their goal is to accompany 3I Atlas as it turns its trajectory towards Earth energetically so it can upgrade the grids and it's helping humanity to move into 7D frequency to aid the rapture."

So, in the past, I've been taught that the rapture is the moment of enlightenment. And so, I wanted to just look at that again to see what they're saying at the moment about the rapture.

So, I said, **"What is the rapture and has it occurred already?"**

They said, "The rapture is a time of energetic alignment of all sentient beings with the frequency of heaven on Earth. The frequency of heaven on Earth or where people experience heaven on Earth is different for everyone based on their life's purpose, their soul development and their perspective. What is considered heaven on Earth for one may be hell for another."

So this reminds me of when I used to teach meditation. I used to explain that peace within people is subjective and I used to say that you're all in this meditation room and some of you may find it very blissful and peaceful and some of you might be thinking this is hell on Earth. Why did I come to this session? But we're still all in the same room. And so this is how people will experience the rapture.

People are at different stages on their journey. There are different situations and different perspectives.
So heaven on Earth is a point of peace, a point of enlightenment. And everybody reaches that space or that perspective in their own time. and in their and under their own circumstances.
So I asked them, **“So how will people individually reach this frequency of heaven on Earth?”** They said that “Each soul right now is experiencing rapid soul expansion as the light codes flood in from the godhead. Whether they have spiritual language to describe what is happening is irrelevant. Essentially the codes are reprogramming the DNA within each sentient being and this is slowly creating a shift in their frequency. The frequency of Earth is also changing as each thing is interconnected by the web of light, the web of love. At a given moment in time, as of yet unspecified, there will be a unity or a synergy between Earth's new frequency of 7D and the frequency of the masses, the collective consciousness.
And at that precise moment, a massive spark, an ignition will run through the whole of humanity in a synchronized flow. And in that moment, people will simultaneously report a sense of peace, a sense of oneness, a sense of knowing, a knowing that everything is interconnected. And this is the moment of enlightenment. Enlightenment is the realization that everything and everyone is interconnected.”
And I said, **"Is Earth at 7D yet?"** And they said, "Earth is currently moving towards 7D and that more planetary shifts and collective consciousness rises and solar and astral activity, including the 3I Atlas, will all combine to create 7D, and it's not far away."
So I asked them **“Is 3I Atlas or its surrounding ships, are they coming to give things to humanity?”** They said, “Not exactly. It is focused on the energetic upgrading solely at this time and the smaller ships which are mostly unmanned are allowing for its safe voyage.”
I said, **"Is the 3I Atlas a White Hat Earth alliance or a Solar Warden mission?"** They said, "It is a combination of all the above."
I said, **"What is the Earth Alliance?"** They said, "The Earth Alliance is a team of military, ETs and government including Q who are

working for the good of humanity.”
So I asked chatGPT “Who are Earth Alliance?” They said the Earth Alliance is said to be humanity's counterpart to the Galactic Federation of Light and that their main mission is to dismantle any remaining control matrix on Earth, which is sometimes called the Cabal, the Deep State, or the Orion Draco Empire. They're here to restore freedom, truth, and abundance for all beings. And they coordinate Earth's entry into the new 5D crystalline era, aligning human civilization with the Galactic Federation's law of universal peace and free will.
The Earth Alliance is said to include humans and off-world members forming a unified coalition. The human components are the White Hat military and intelligence groups within the US, Russia, China, and other major nations. Also whistleblowers, scientists and truth communities working to expose hidden technologies, corruptions and suppress knowledge and light workers, starseeds and spiritual leaders who are anchoring higher frequencies onto the planetary grid. The off-world components or the higher dimensional components are the Pleiadians, the Arcturians, the Andromedans and Syrians who are providing spiritual and technological guidance. the Galactic Federation of Light Officers who act as advisers and mediators and inner Earth civilizations from Agartha who assist in planetary healing and energy stabilization.
They said for operations and alliances, the Earth Alliance is often associated with major hidden operations, including the disclosure of extraterrestrial contact and suppressed technologies like free energy, Medbeds, and anti-gravity. For example, NESARA GESARA, which is the global financial reset towards abundant systems, peace treaties with off-world groups as part of the worldwide military peace plan, and dismantling the Saturn/Moon control matrix and other artificial energy grids around Earth.
They said the spiritual mission of Earth Alliance is beyond politics or military reform. The Alliance's ultimate goal is planetary ascension, guiding Earth into the golden age of light, where humanity will reclaim its sovereignty and divine potential. Earth re-enters the Galactic Federation as a peaceful awakened civilization and that the

Christ consciousness grid or crystalline light network becomes the new governing frequency.
They said the leadership as often channeled or described will be of various spiritual sources which mentions guidance from commander Ashtar who represents the Galactic Federation. Archangel Michael leading the angelic protection of Earth's awakening. prime creator source energy acting through the higher councils of light and the ground commanders who are incarnated humans carrying leadership frequencies of the alliance.
The Earth Alliance, which is sometimes written as Earth Alliance and Resistance Movement, is a term widely used in galactic disclosure and ascension communities to describe the coalition of human and off-world forces working together to liberate Earth from oppressive control systems. They are visible in the political, financial and military sector and then hidden through energetic, interdimensional or extraterrestrial.

Now just going back briefly to the Seeder races.
I asked, **“Are the Lyrans one of the Seeder races?”** They said, “Yes, they were one of the first Seeders on Earth. They created the first civilizations in Africa and the southern hemisphere.”
And I said, **“Are the Lyrans involved in the mission of 3I Atlas?**” They said, 'Not exactly, but they are involved in the upgrading of Earth's frequencies via different programs.”
And I said, **“What are these programs?”** “The Lyrans are concerned with humanity and freeing it from the false matrix programs.”
So I said, **"Is this in any way connected to either the moon control matrix or the Saturn control matrix?"** And they actually said, “No.” to the moon control matrix and “Yes,” to the Saturn control matrix.
So I said, **"What is the Saturn control matrix?"** They said it's an artificial inverted reality which has been overlaid over humanity to restrict the elevation in collective consciousness. It was originally put over the matrix of love by the Draco.”

So I asked chat GPT what is this Moon/Saturn control matrix? They said that the moon Saturn control matrix is a concept from alternative cosmology and gnostic interpretation, interpretations suggesting that Saturn and the moon are functioning as an energetic or technological system which projects a false reality around Earth and that the key ideas are that Saturn is acting as a broadcasting tower. which transmits frequency waves through its rings and that the moon is then acting as a re relay satellite modulating and directing these frequencies towards Earth and that this system combined creates a control grid of low vibration, fear and illusion which is often associated with reincarnation loops and mind amnesia.
They said that the Draco connection is that in galactic law, the Draco from Alpha Draconis are portrayed as a dominant negative polarity species, highly hierarchal and imperial, and that their link to the control matrix is that the Draco are often described as the operators of the Moon/Saturn curtain system using it to suppress human consciousness, that they are said to manipulate fear and division and conflict to main control, and that some secret space narratives claim that the Draco established strongholds around Saturn and Earth's Moon to manage these systems.
They're saying from a higher perspective in modern ascension teaching, the Draco is also a symbol of our shadow consciousness representing domination and fear within the human collective and that through healing, forgiveness, and love that the light workers dissolve the Draco program both within and without. So when I'd asked about the Lyrans, they had said the Lyrans are concerned with humanity and freeing it from the false matrix programs.
I said **“Is this connected to the moon control matrix?”** They said, “No.”
I said, **“Is it connected to the Saturn control matrix?”** And they said, “Yes.” So I'm not sure if that means that the Moon control matrix might be under control.
So I asked them, **"What is the Saturn control matrix?"** And they said again, “It is an artificial inverted reality overlaid over humanity to restrict elevation in collective consciousness and it was originally put in the matrix of love by the Draco.

And I said, **"Is it technology that they use to create this false matrix?"** And they said, “In some cases yes, but also it is mind control and frequencies.”
I said **“Is this created on planet or above planet?”** And they said, “In some cases it's a mixture of both.”
So I said **“Is this artificial trap or this matrix that's being set up to siphon people's energy and also known or referred to as *loosh*, is this being dissolved?”** They actually said, “No.”
And I said, **"Is it a real phenomenon?"** They said, "Yes."
And I said, **"Who's in control? Who's controlling it?"** And they said, "The Draco control the loosh siphoning matrix."
And I said, **"Why is it not being stopped?"** And they said, "It will stop when the collective consciousness reaches 12D and in the meantime it is necessary to remain protected in the god's light.”
So I said **“Can we dismantle the loosh, this loosh matrix?”** They said “There's no way to dismantle the loosh matrix. We have to vibrate above it.”
And I said, **“What vibration is loosh or this dark siphoning program? What vibration is it at? Is it at a vibration of 6D currently?"** And they said, "We are currently face to face with it."
And I said, **"So why do we need to collectively reach 12D before it stops?"** They said, "The Draco have capacity to siphon on any dimensional frequency. It is only a possibility to stop this once the collective shield or vibration reaches the level of 12D. It's currently only possible to stop the Draco siphoning once we reach the level of 12D. But as we adapt, so does the dark and in a place of duality, this will always be the situation. And we cannot outrun the dark. Instead, we protect from within with hearts full of love and light by living in simplicity, passion, and gratitude."
And I said, **"Is there technology used on the moon and Saturn to create these siphoning setups?"** And they said, "Not exactly. It's more the intentions and focus held by the parasitic forces that creates an artificial fear matrix over Earth's frequency and as people rise in consciousness, it will be harder for parasitic energies to feed. They will still be around. But as we learn to protect our energies

through love, intention, simplicity, and gratitude, it will be harder for these energies collectively to hook into our energies."
So I said, **"Is 3I Atlas involved in breaking this false matrix?"**
They said, "Yes, it is realigning frequencies within the matrix of love or the Ley lines for example to a higher frequency of 7D to break through the dark matrix of control that has been suppressing humanity. The upgrade of the grids will be will by default upgrade the consciousness of the people so they no longer can be suppressed by the old paradigms or programming."
So what this suggests to me is that there's kind of a race to get ahead of the Draco's control system. So it would seem that until consciousness gets to 12D, collective consciousness, that is, that this lower energy parasitic loosh system could still affect people essentially and that it would seem that we're being given a leg up and over the Draco, which they're saying are currently operating at 6D.
So if we're able to exponentially have a quantum lift or *quantum shift,* I should say, up and over to say 7D initially which is why 3I Atlas is arriving to help the energetic grids, then effectively we could jump up and over even if it's just temporarily, above the current vibrational rate of the Dracos which they're saying they're currently holding at 6D.
So, it's like we're getting a head start. And if the collective consciousness could then leap up and over the Draco's vibration and hold it collectively and strongly in a protective bubble, then we might be able to keep their negative parasitic energy, to the greater extent, under control until the time where they're able to mimic or raise their vibration again up. and over where we are currently headed.
It's kind of like a race to get to 12D. We need to get to 12D because they're saying that once we're at 12D collectively that it's unlikely that this Draco energy can parasitically enter our energy field or that's the way I've understood it.
I'd be interested to hear your thoughts on that.

Then we recently had a USA government shutdown and in conjunction with that there was a call for all the generals to meet with

President Trump.
So I said **“The recent call for all generals to meet with President Trump. Is that in any way connected to 3I Atlas?”** And they said, “Yes, before the new timelines are activated. The the military needs to be cleansed, upgraded, and reorganized to allow for only White Hat operations, and that anyone who's compromised will be released and asked to resign, and that a total reorganization and cleaning up is now beginning.”
I said, **“During the government shutdown, what was going to happen?”** They said “The Trump transition team will continue to clean up and clear out any personnel structures or policies that hinder devolution of governance.
I said, **“Is there also a cleanup of the elite satanic organizations?**” They said, “On the whole these have already been dismantled, reorganized and dealt with, but at the lower levels there's still a lot of cleaning and clearing up to do.”
I said, **“Are military personnel involved in these Satanic rings?”** They said, “In some cases military personnel are compromised sometimes by choice and sometimes via MKUltra technology and trapping.”
I said, **"Who is trapping military personnel with MKUltra and technology? Is it on planet or off planet?"** And they said, "Both. Secret societies associated with the military on Earth, including the CIA and the NSA and the Pentagon."
So I said, **"Apart from clearing out Satanic groups within the military, what else will the military reorganization be focused on?"** They said, “They're mainly reassigning generals in line with all aspects of devolution, including technology, and reorganizing the culture, the values, and the parameters for military leadership going forward. The military structure will be streamlined, the bureaucracy and change of command will be simplified, and that whistleblowing will be encouraged.
I said, **“Will organizations who work with the military be financially blacklisted if any of their personnel are linked to these Satanist rings or activities?”** They said, “Yes.”

So if you look at this article from the 19th of September published by Barron's, it says that Russia is to seize assets of international Satanists. They said Russia on Friday added what is it termed the international Satanism movement to a financial blacklist enabling it to freeze the assets of alleged members even if they have no criminal record. I'll put the full link to this document in this description below.
I said, **"How many military senior officers, say flag officers, how many have been compromised by corruption or involved in some form of coven or been practicing Satanic worship or spellwork?"** They said, "The flag officers are infiltrated to around 15% and all are known."
And I said, **"Is this figure representative of a problem worldwide with senior military staff?"** And they said, "Yes. In some locations, the infiltration and corruption is even higher and at present not so efficiently highlighted as in the USA. As consciousness rises, the suspects will be more easily identified. At the level of the Galactic Federation of Light, all suspects in all regions are known and this is because the Galactic Federation of Light reads soul signatures."
I said, **"This infiltration of dark magic and Satanism in the military, is it a curse?"** They said, "No, it has been a method in the past used to manipulate outcomes towards a specific group's interests."
And I said, **"Interests?"** and they said, "Magic has been used nefariously to adjust outcomes in dialogue regarding politics, procedure, and the appointments of staff. Sometimes this black magic has been combined with technology and even though to date this has seemed under the radar. Every action, intention and outcome has been captured and recorded. And there will be severe karmic repercussions regarding these actions where people's sacred space, free will or divine missions were attacked. Major karma will now ensue. Everything is known at the Galactic Federation level and above and God sees everything. No stone will be left unturned going forward. Everything will be exposed. No one can hide as all thoughts and intentions are known. A consciousness scan by the Galactic Federation of Light unlocks all bad intentions. manipulative tactics like MKUltra will now be halted and prohibited." So I said, "As with

the Barron's document, are we saying that some of the military have been blacklisted?" And they said, "Yes."
I said, **"Is it the flag officers of the military?"** And they said, "Going forward all known cults, secret society involvement within the military, whatever rank, will result in instant dismissal and financial blacklisting. And in some cases, the removal of assets if it is shown that they were acquired or due to membership of the groups or organizations that are satanic or otherwise. The Galactic Federation of Light do not allow satanic practices, covens, or mind control practices. As all manipulation of energy or selfish, coercive intent is known and is deemed as a breach of divine law."
I said, **"Are the military generals being briefed to clear up more tunnels?"** They said, "No. Work has largely been completed and that the generals will now be focused on cleaning up land organizations, reentering dialogues around gender and recreating more innovative approaches to culture in the space force divisions. Chains of command will be streamlined like a DOME Department Of Military Efficiency.
I said, **"Is Peter Hegseth overseeing this?"** And they said, "Yes he is along with Tulsi Gabbard."
I said, **"The government shutdown seems to correspond with the movement of the 3I Atlas and was this the plan?"** And they said yes.
I said, **"Are the military being briefed on the 3I Atlas?"** They said, "No, not exactly. The military are being briefed on the next stages of military law within the USA and the devolution of governance as we move more into devolution under space law. Space law is a whole new setup and is partially being devised as part of the worldwide military peace plan but will be developed in line with devolution of governance to *We the People*. A whole new era of law will be established as these plans unfold and that the military are being briefed on how this may look going forward and their role in helping to establish a new kind of governance. Old legal procedures are being stripped back and reorganized and this includes law regarding how government operates, how policy and procedure is formatted,

the future of policing and the future of the judicial system, its setup and how its policy and procedure will now change during devolution."
I said, **"Has the government shutdown in the USA anything to do with why all the space observation or observatories worldwide seem to be shut down regarding the trajectory of 3I Atlas?"**
They said, "The shutdown of space observatories internationally are shut down to the 3I Atlas is part of a worldwide strategy regarding the worldwide military peace plan."
And I said, **"In what way does the integrity of the worldwide military peace plan mean that observatories need to be closed?"** And they said "Communications are occurring back and forth between Earth and this technology of the Galactic Federation and currently the governments want to keep this secret to protect the trajectory of the technology. It will help upgrade the Earth's grid, the energetic matrix of light, and having full open observation may elicit an attack military or otherwise, if not kept open to only a select few who are already written securely into the worldwide military peace plan."
I said, **"How does the Galactic Federation balance technology with spirituality without breaching divine will or sovereignty?"**
They said that, "All technological advances within the Galactic Federation of Light is agreed by all parties, all ET races within the Galactic Federation of Light and they agreed to the new tech as it becomes available. All tech is designed around consciousness ID. So where a contract a soul contract does not agree to the tech being around or used in its vicinity then under Galactic Federation rules it cannot and will not activate."
I said, **"So can you give me an example of that?"** They said, "Where a technology could save a life, for example, but the person's soul contract was not in agreement then the tech would not work."
So it would seem that the technologies within the galactic federation of light are only able to operate or go ahead dependent upon a soul contract. So even if you were dying and the technology was able to save you, if in your soul contract that was not what had been agreed, then the technology would know from your consciousness ID, your

soul contract not to heal you or to save you because it's not within your soul contract.
So this is the same as say an angel. An angel acts under divine will and can only come to help you upon request. The only time it doesn't do that and oversteps that request, the only time an angel will intervene without a direct request is where you might be about to go into an accident and lose your life, for example, but your soul contract in that situation had agreed that you would stay alive and in that moment an angel will step in and save your life.
So it's the same principle, but in this instance it's regarding the technologies of the Galactic Federation of Light.
So finally I wanted to do a golden light shield technique. Now this technique can help you to shield yourself from psychic attacks which can manifest as fatigue, fear or confusion.
The first thing you do is you need to breathe and center. So you take three deep breaths, releasing the tension with each exhale and then you call in the highest light. You could say something like, "I now connect with my higher self and the source of infinite love and light."
Don't forget that light is wisdom and knowledge. You expand this light by visualizing a radiant golden sun above your head and it's streaming light into your heart and expanding all around you. And then you seal this shield by forming a sphere of crystalline golden light. And you affirm only energies of love and truth may enter and all else is transmuted to love. Then you ground it to the Earth by sending roots of light down to the planet's crystalline core.
And then you close with gratitude and you thank your guardians. and you breathe and you return to the present. If you do this exercise regularly, you will strengthen your auric coherence and it will dissolve your fear patterns and align your frequency to the higher federation streams of protection.
I hope you've really enjoyed this information today. Thank you for supporting me, for all of your donations, all your lovely emails and comments and your feedback or sending me the latest information and I look forward to seeing you all next time.
Bye for now.
